Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6647327. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed limitations as recited in the present application are similar as to the claims of the patent. One

Art Unit: 3663

thing different is that in the present application, the "data bus configured as a ring line" has not been recited. It should be noted that the application and the patent would not be patentably distinct from each other because they both teach "an interface unit and a plurality of multimedia units each connected to a data bus".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being unpatentable by Obradovich et al. (US 6233506).

Claims 1, 4-6, and 13: Obradovich et al. disclose a vehicle system with multimedia devices such as the system taught by the applicant. As shown in Fig. 1 of the invention, a variety of multimedia units are connected to the data bus (107). There is at least one communication interface for communicating with external unit, including navigation unit (106d) for receiving the current GPS data of the vehicle. Obradovich et al also disclose coordinating/arbitrating at the

Art Unit: 3663

interface unit requests for radio connection to the external unit (Obradovich et al., abstract; column 6, lines 10-62; column 12, lines 5-15).

Claims 2 and 12: At least one communication interface unit is communicated with external unit is illustrated in Fig. 1 of the Obradovich et al.'s invention.

Claims 3, 8, 11, and 15: As shown in Fig. 1, the input interface (104) is used for input the requesting information, and sending the data from that interface unit to the plurality of multimedia units connected to said multimedia system.

Claims 7, 9, 10, 14, and 16: Obradovich et al. disclosed that the multimedia system, wherein at least one interface unit is connected to the data bus (107) as a separate unit (Obradovich et al., Fig. 1).

Claim 17: Obradovich et al. disclose that the navigation communication interface, or other communication interface is provided as a single unit connected to the data bus (107) (Obradovich et al., Fig. 1, data bus 107).
